Strawberries

N/A

Matrix: Flower

Certificate of Analysis

Sample: CA50807003-001

Harvest/Lot ID: 2

Batch#: 1

Sample Size Received: 3 gram

Retail Product Size: 1 gram

Ordered : 08/06/25

Sampled : 08/06/25

Completed: 08/14/25

Analysis Method : SOP.T.30.031.TN & SOP.T.40.031.TN Expanded Measurement of Uncertainty: Flower Matrix d9-THC: ± 0.100 , THCA: ± 0.124 , TOTAL THC ± 0.112 . These uncertainties represent approximately the 95% confidence level using a coverage factor $k=2$ for a normal distribution.

needed uncertainty expressed

Full spectrum cannabinoid analysis utilizing High Performance Liquid Chromatography with UV/PDA detection (HPLC-UV/PDA). All cannabinoids have an LOQ of 0.01%.

This report shall not be reproduced, unless in its entirety, without written approval from Certified Laboratories/Labstat. This report is a Certified Laboratories/Labstat certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived. Void after 1 year from test end date. Cannabinoid content of batch material may vary depending on sampling error. Some testing may be performed at Blue Bonnet Labs (DEA#R0607436). ND=Not Detected, NA=Not Analyzed, ppm=Parts Per Million, ppb=Parts Per Billion. Limit of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Acceptance levels are statistically determined through variable based on uncertainty of measurement. Unit for the analyte. The uncertainty is available from the lab or request. The "Decision Rule" for this assay is: if the inclusion of the uncertainty is based on P.S. Rule 64-4.310.
